SCORECARD

CDP SCORE

Responses to the Carbon Disclosure Project (CDP) supply chain survey are scored on three factors: disclosure, performance and supplier engagement. The ratings are expressed in bands (A, A-, B, B- C, C-, D, D-), with A being the highest level possible.

CLIMATE SCORE

CDP's Climate Disclosure Score is a measure of the quality and comprehensiveness of the information provided in the company's response to CDP's annual climate change questionnaire. The disclosure score is a metric of good internal management, an understanding of climate change issues and company transparency on climate change.

D 2017 AVERAGE*** DISCLOSURE SCORE

SUPPLIER ENGAGEMENT

The CDP Supplier Engagement Rating is a scoring system that evaluates the supplier engagement practices of companies. This score is determined by evaluating supplier involvement in the criteria of governance, target and initiatives, and Scope 3 emissions. The goal of the rating is to reduce emissions in global supply chains by increasing supplier engagement.

10,126 TONS RECYCLED

3-FRONT APPROACH TO
SUSTAINABILITY

1. RESPONSIBLE SOURCING

We partner with vendors who utilize renewable forestry for paper products and are certified through Sustainable Forestry Initiative® (SFI®) and the Forest Stewardship Council® (FSC®).

2. RECYCLING

We manage our waste with comprehensive reduction and recycling programs throughout the company.

3. RESOURCE MANAGEMENT

We measure and manage our energy, water, and landfill usage with programs and goals to minimize the impact on natural resources.
